

The Institute on **Youth, Workforce Development, and Closing the Skills Gap** will provide a multinational group of 18 experienced foreign faculty and practitioners with a deeper understanding of how new socioeconomic trends have changed the concept of work, workforce development, and career paths in the United States. The academic program will include a thorough discussion of the role of U.S. educational institutions, particularly community colleges, in preparing Americans with the skills needed to succeed in multiple industries including business, technology, science, the creative arts, and other emerging fields. Topics such as urbanization, globalization, economic development, and advances in technology such as automation, robotics, and artificial intelligence will also be included. The Institute will offer opportunities for participants to research new ideas, in conjunction with American peers, to better understand the evolution of work, the changing demand for skills, and the advancements in workforce development through retraining, reskilling, and closing the skills gap. The program will take place during the June to August timeframe in 2019. This Institute along with three other SUSIs for scholars are currently being openly competed under one award; the recipient and implementing institutions will be known in April 2019.
